ALLOWANCE

Claims 1-17 are allowed.

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest the claimed invention. Specifically, the prior art of record fails to teach or suggest instantiating a class with an interface as a template parameter such that a first and second template class are associated with highest and lowest level of a hierarchy of component model interfaces, as recited in the independent claims 1 and 17. Additionally, the prior art of record fails to teach or suggest providing an interface of the lowest level of the hierarchy as a template parameter to a template class directly inherited by the second class ("inherited" understood to create a tangible instantiation of the template class) such that a first and second template class are associated with highest and lowest level of a hierarchy of component model interfaces, as recited in the independent claim 16.

The prior art of record, **Gibbons** et al. (USPN 6,412,019), disclosed interface inheritance. However, **Gibbons** failed to disclose the independent claims as recited, including template classes.

The prior art of record, **Shepard et al.**, disclosed class instantiation. However, **Shepard** failed to clearly disclose the independent claims as recited, including the first and second template class relationships with the interface hierarchy.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
